Please forward to [REDACTED]

To [REDACTED],

Henrik Svensmark discovered a startling connection between the cosmic ray flux from space and cloud cover and recent results from Cern confirms this research.  
Comics' Leaving Outdoor Droplets or the CLOUD . Are you aware of the science? Are you aware of its implications to the "Consensus" on climate change and AGW.

Our weather is not climate. I am deeply offended that you use the deaths of loved ones in the recent Victorian bush fires to peddle lies to the community about climate change and its affects. You should be ashamed that policy is driving the science and that you are putting your voice behind policy rather than truth. **Are you morally and ethically aware (awake) of your actions?** ALSO Please stop telling lies about sea level rises. It is so full of BS it is not funny it is insulting to anyone with enough intelligence to do simple research about sea level rises.

I ask that you seek the truth objectively and use your voice for truth. I am all for renewable energy, a greener society and less pollution but you and I both know the carbon tax is fraudulent and will hurt many people for the sake of a few. The carbon tax will not change our climate for the better it will have no affect at all.

Please be truthful in the future.
